

# Dinomins

## Chewable vitamin-mineral formulated for children two years or older.

When given the chance to choose, most kids would pick pizza and cookies over fruits and vegetables. By adding Dinomins to their diet, however, you can be sure that your tots, tykes and teens get the vitamins and nutrients they need.

Few doubt that nutrition plays a critical role in everyone's health, but it is especially important for developing young bodies. Between children's active lifestyles and their physical development, it is crucial for them to receive adequate amounts of all the vitamins and minerals they need.

Proper nutrition from an early age helps give children the building blocks of health for the rest of their lives. In addition to providing children with a well-balanced, proactive, nutritional program that includes plenty of fresh fruits and vegetables, pediatricians often recommend vitamin and mineral supplements.

Some children shy away from swallowing tablets, which is why flavored, chewable vitamins were invented and why they must taste great and be fun to take. Herbalife's Dinomins are that...and more!

Dinomins are formulated with vitamin C, one of the most powerful antioxidants.\* Dinomins are also packed full of vitamin A, a vitamin involved in the formation and maintenance of healthy skin, hair and teeth; and Vitamin D, which helps maintain normal blood levels of calcium and phosphorus in the body while helping to form and maintain strong bones.\* Dinomins also includes many other important vitamins including vitamin E, vitamin B12, zinc, copper and calcium.

Yummy-tasting and shaped like miniature dinosaurs, these chewable vitamin-mineral tablets are formulated specifically for kids. And, each tablet is chockfull of essential vitamins and minerals necessary for healthy growth and development.\*

## Discussion Points

- Perfected for a child's taste buds: Includes three fruity flavors that children will ask for every day.
- Easy to take: Chewable and easily digestible, kids won't say "no" to Dinomins.
- Nutrition can be fun: The playful dinosaur shapes will appeal to kids of all ages.
- Grow up: Helps grow healthy bodies with its 21 essential vitamins, minerals and nutrients.\*

## Did You Know?

Vitamins E and C are two of the most powerful antioxidants needed by the human body. Vitamin E helps maintain strong cell membranes and plays an important role in helping the body protect itself. Vitamin C is a key player in combatting cellular damage caused by free radicals. It also reacts with other antioxidants and minerals in your body to help transport them to cells where they can perform their vital functions.
